

Neuroscience Graduate Program

ngp.usc.edu

Interested in Interdisciplinary PhD Training?

The Neuroscience Graduate Program (NGP) is an interdisciplinary, university-wide graduate program at USC. Students in our program conduct groundbreaking research at every scale imaginable, from structural analyses of proteins to mapping functional circuits in human participants, from fundamental questions about biological and computational processes in the nervous system to translational questions about drug targets, rehabilitation therapies and brain-computer interfaces. Our faculty are internationally recognized experts in their fields, and their labs are in one of the most exciting, dynamic, and diverse cities in the world.

Admission & Program Statistics

Averages:

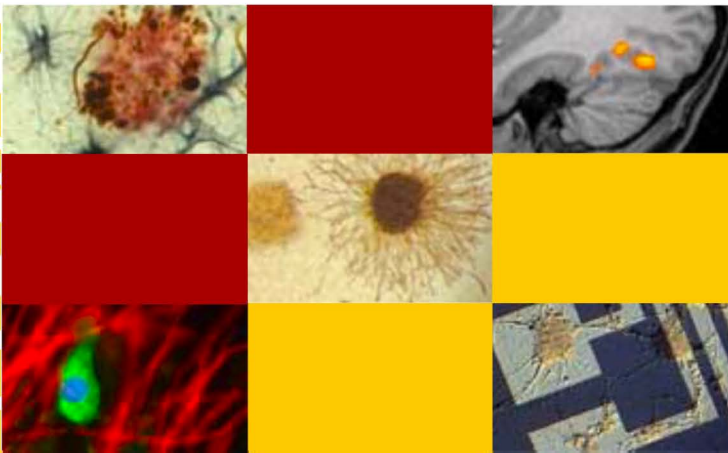

- GPA – 3.7
- Cohort Size – 16
- Years to Degree – 5.5

Student Financial Packages Include:

- \$39,200 Annual Stipend
- 36 Units of Tuition/Year
- Student Health, Dental, and Vision Insurance
- *All NGP Students are fully funded for the entire duration of the program*

Program Fundamentals:

- 3 Lab Rotations
- Programming Boot Camp
- Annual Retreat
- Student Lead Neuroscience Graduate Forum
- 4 Campus Locations
- Grant-Writing Workshop
- Distinguished Seminar Series
- Annual Symposium
- Professional, Social, and Program Activities
